

SINETHEMBA MVELASE

Junior Quantitative Analyst | Risk Analytics | Data & Model Support

Johannesburg, South Africa • thegoatzeldris70@gmail.com • +27 72 411 0997

PROFESSIONAL SUMMARY

Analytically driven **Technology Management Graduate** at **Vodacom Financial Services** with a **BSc in Mathematics and Physics** and hands-on experience in **quantitative analysis, statistical reasoning, SQL/Python data engineering, business intelligence, and executive reporting** across a large financial services environment.

Combines a **rigorous mathematical foundation** (probability, statistics, linear algebra, mathematical modelling) with **applied data-science delivery**: extracting large datasets from **Google BigQuery**, engineering transformations, running **exploratory data analysis**, and translating findings into dashboards and executive insights for senior stakeholders in Risk Management, Technology Assurance, and Service Management.

Positioned to add immediate value to the **Group Risk Quant Team at Old Mutual**, contributing to **model development support, model validation, model risk oversight, data quality management, dashboarding, and reporting automation** while continuing to grow as a **Quantitative Analyst** in financial services.

CORE COMPETENCIES

- Quantitative & Statistical:** Quantitative Analysis • Statistical Analysis • Probability • Linear Algebra • Mathematical Modelling • Machine Learning • Exploratory Data Analysis (EDA) • Hypothesis Testing
- Data Engineering:** SQL • Python (pandas, NumPy, scikit-learn) • Data Extraction • Data Cleaning • Data Transformation • Data Modelling • ETL Workflows • Data Quality Management
- BI, Reporting & Dashboarding:** Power BI • Excel (Advanced) • Tableau (working knowledge) • Alteryx (working knowledge) • KPI Reporting • Executive Dashboards • Reporting Automation
- Cloud & Platforms:** Google BigQuery • Google Cloud Platform (GCP) • Vertex AI • AWS • Supabase • PostgreSQL
- Model & Risk Support:** Model Development Support • Model Validation Support • Model Risk Oversight • Governance Reporting • Risk Analytics • Financial Services Analytics
- Business & Delivery:** Executive Reporting • Stakeholder Engagement • Project Governance • Process Automation • ITIL 4

TECHNICAL SKILLS MATRIX

Domain	Tools & Techniques	Proficiency
Programming	Python, SQL, JavaScript, TypeScript	Advanced (Python, SQL)
Statistics & Maths	Probability, Statistics, Linear Algebra, Mathematical Modelling	Advanced
Data Analytics	EDA, Data Cleaning, Data Transformation, Feature Engineering	Advanced
Business Intelligence	Power BI, Excel, Tableau, Alteryx	Advanced (Power BI/Excel); Working (Tableau/Alteryx)
Cloud & Databases	Google BigQuery, GCP, Vertex AI, PostgreSQL, Supabase	Intermediate–Advanced
Machine Learning	Regression, Classification, scikit-learn, Model Evaluation	Intermediate
Version Control / CI-CD	Git, GitHub, GitHub Actions	Intermediate
Model & Risk Support	Model Validation Support, Data Quality, Governance Reporting	Foundational–Intermediate

PROFESSIONAL EXPERIENCE

Discover Graduate Trainee — Technology Management

Feb 2025 – Present

Vodacom Financial Services — Johannesburg, South Africa

Embedded within senior technology leadership to deliver data-driven analytics, reporting, and governance support across Risk Management, Technology Assurance, Service Management, PI Delivery, and AWS Cost Optimization.

- Deliver **quantitative analysis and executive reporting** for senior management, translating operational and financial data into insights presented at **Steering Committees** and **Management Committees**.
- Build **dashboards, analytical models, and PowerPoint decks** used by ExCo-level stakeholders for strategic decisions across the Financial Services division.
- Support **Risk Management** and **Technology Assurance** functions with data extraction, KPI tracking, and reconciliation of metrics — foundational skills transferable to **model validation and model risk oversight**.
- Contribute to **AWS Cost Optimization**, analysing cloud consumption datasets, identifying variance drivers, and producing recommendations to improve spend efficiency.
- Automate recurring reporting workflows** using Excel and Python, reducing manual effort and improving data-quality controls.
- Engage cross-functional stakeholders (Finance, Technology, Operations, Assurance) to define KPIs, agree data definitions, and align on reporting standards — critical to **data quality management**.

Reporting Analyst Intern

Jun 2024 – Jan 2025

Vodacom Financial Services — Johannesburg, South Africa

- Developed and maintained **Power BI dashboards** and **advanced Excel models** tracking KPIs and business performance for internal stakeholders.
- Performed **data cleaning, transformation, and reconciliation** across multiple data sources to ensure reporting accuracy and consistency.
- Delivered recurring and ad-hoc **business performance reports**, converting raw data into commercial insight for management review.

- Automated repetitive reporting processes, reducing turnaround time and improving accuracy — practical experience relevant to **reporting automation** and **data quality**.
- Data Scientist (Project-Based Engagement)**
Vodafone Portugal — Data Science Project

Cross-Border Engagement

 - Wrote SQL queries on **Google BigQuery** to extract, join, and transform large-scale enterprise datasets for analytical modelling.
 - Performed **exploratory data analysis (EDA)**, feature preparation, and data-quality checks on **Google Cloud Platform**, leveraging **Vertex AI** for machine-learning workflows.
 - Applied **statistical and data-science techniques** (distributions, correlation, clustering, model evaluation) to business data, producing analytical reports and recommendations.
 - Strengthened experience in **cloud-native quantitative workflows** — directly applicable to enterprise risk-analytics environments.

PROJECTS

KasiKash — Data-Driven Financial OS with Alternative Credit Scoring
Founder & Lead Developer

- A financial operating system for township SMEs featuring an alternative credit scoring engine and structured financial-transaction analytics.
- Designed "**KasiScore**", a proprietary **alternative credit-scoring model** built on transaction volume, frequency, repayment behaviour, and stokvel contribution patterns — a hands-on **quantitative modelling** exercise directly analogous to credit risk analytics.
 - Engineered **structured data capture** from voice and text inputs into a normalised **PostgreSQL / Supabase** schema, enabling downstream **analytics and reporting**.
 - Built financial-transaction processing, categorisation, and reconciliation logic — foundational to **financial services analytics** and **data quality** work.
 - Stack:** React, TypeScript, Supabase, PostgreSQL, GitHub Actions (CI/CD).

CAPS AI Tutor — Analytics-Backed Educational Platform
Founder & Developer

- Applied **NLP and data-processing pipelines** to curriculum content aligned with the South African CAPS framework.
- Deployed on cloud infrastructure with automated CI/CD, applying **data-engineering** principles to content ingestion and analytics.
- Demonstrates capacity for **end-to-end analytical system delivery** and productionising models.

Enterprise Delivery Management Platform
Full-Stack Engineer

- Designed the **relational data model** and **PostgreSQL schema** underpinning driver trip tracking, cash-on-delivery reconciliation, and dispatch analytics.
- Built **real-time analytics** for operational performance tracking using Node.js, Prisma, Redis, and Socket.IO.
- Practical experience translating **business processes into data models** — directly transferable to risk data engineering and reporting.

EDUCATION

Enterprise and Technology Management
NWU Business School • 2024

BSc Mathematics and Physics
University of Johannesburg • 2019 – 2023
Key modules: Applied Mathematics, Probability, Statistics, Linear Algebra, Mathematical Modelling, Numerical Methods.

KEY STRENGTHS

- Strong quantitative foundation (BSc Mathematics & Physics) applied to real-world financial services data.
- Fluent in **Python and SQL** for data extraction, transformation, statistical analysis, and modelling.
- Delivering **BI dashboards** and **executive analytics** in a regulated financial services environment.
- Practical experience with **alternative credit scoring** and **financial data modelling** via KasiKash.
- Comfortable engaging **senior stakeholders** and translating quantitative findings into business decisions.

ATS KEYWORDS

Quantitative Analysis • Quantitative Analyst • Quantitative Risk • Risk Analytics • Data Analytics • Data Analysis • Statistics • Statistical Analysis • Probability • Linear Algebra • Mathematical Modelling • Python • SQL • Data Modelling • Data Engineering • Data Extraction • Data Transformation • Data Cleaning • Data Quality • ETL • Business Intelligence • BI • Dashboarding • Reporting Automation • Power BI • Tableau • Alteryx • Excel • Machine Learning • Model Development • Model Validation • Model Risk • Model Risk Oversight • Financial Services • Financial Analytics • Google BigQuery • GCP • Vertex AI • PostgreSQL • GitHub • GitHub Actions

CERTIFICATIONS

Machine Learning Specialization
DeepLearning.AI / Stanford University (Andrew Ng)

ITIL 4 Foundation
IT Service Management

LANGUAGES

- English — Professional
- isiZulu — Native
- Sesotho — Conversational
