

SINETHEMBA MVELASE

AI Engineer & Full-Stack Builder | LLMs, AI Agents & Automation | Idea Production

Johannesburg, South Africa (Remote-ready) • thegoatzeldris70@gmail.com • +27 72 411 0997

Live AI Product: kasikash.com • GitHub: github.com/snerantie

PROFILE

Hands-on **AI engineer and full-stack builder** who takes ideas from concept to production — the architect, engineer, and product owner of my own shipped AI products. Founder of **KasiKash (kasikash.com)**, a live LLM-powered platform, and **CAPS AI Tutor**, a conversational AI agent on **AWS Bedrock (Claude)** with WhatsApp/USSD integrations.

Strong across the stack — **Node.js, Express, React, TypeScript, PostgreSQL** — with deep applied experience in **LLMs, AI agents, orchestration, prompt engineering, and RAG**. I design clean **APIs and system architecture**, ship via **CI/CD on AWS/GCP**, and automate workflows end-to-end. I thrive in ambiguity, work independently, and enjoy turning messy business problems into scalable technical solutions.

Backed by a **BSc in Mathematics and Physics** and current experience partnering with senior business stakeholders at **Vodacom Financial Services** — so I pair engineering depth with genuine business acumen and communication.

WHAT I BRING TO THIS ROLE

- Production AI applications:** Shipped live LLM products (KasiKash, CAPS AI Tutor) — not demos. Conversational AI, voice AI, and NLP running in the real world.
- LLMs & AI agents:** LLM integration (Anthropic Claude via AWS Bedrock), prompt engineering, RAG-style grounding, agent/workflow orchestration, cost-controlled inference.
- Full-stack engineering:** Node.js, Express, REST APIs, React 19, TypeScript, PostgreSQL, Prisma, Redis, Socket.IO (real-time), JWT auth, Bull Queue (background jobs).
- Workflow automation:** Automated build/test/deploy with GitHub Actions CI/CD; automation tooling in Python; ready to adopt n8n and similar orchestration platforms.
- Cloud & architecture:** AWS (incl. Bedrock), Google Cloud Platform, Vercel, Render; API design and pragmatic systems architecture.
- Product ownership:** Founder mindset — owned KasiKash from idea to production with no PM; comfortable with minimal direction.
- Business partnering:** Translate stakeholder problems into solutions; executive communication honed at Vodacom.

TECHNICAL SKILLS MATRIX

Domain	Technologies	Proficiency
Backend	Node.js, Express, REST APIs, Socket.IO, JWT, Bull Queue, Python	Advanced
Frontend	React 19, TypeScript, Vite, Tailwind, React Query, Zustand	Advanced
AI / LLMs	AWS Bedrock, Anthropic Claude, Prompt Engineering, RAG, AI Agents, NLP	Advanced
Databases	PostgreSQL, Prisma, Redis, Supabase, BigQuery (NoSQL/MongoDB familiar)	Advanced (SQL); Working (NoSQL)
Cloud & Deploy	AWS, GCP, Vercel, Render, GitHub Actions CI/CD	Advanced
Automation	GitHub Actions, Python scripting, workflow orchestration (n8n-ready)	Intermediate–Advanced
Architecture	API Design, Systems Architecture, Real-Time Systems, Data Modelling	Intermediate–Advanced
Languages	TypeScript, JavaScript, Python, SQL	Advanced

PROJECTS (PRODUCTION AI & FULL-STACK)

- KasiKash — AI-First Financial Platform**
Founder, Architect & Lead Engineer — idea to production

kasikash.com (live)

 - Owned the full lifecycle: **architecture, implementation, deployment, and iteration** — exactly the "architect + engineer + product owner" mandate of this role.
 - Built a voice-first, multilingual AI platform: **Web Speech API + NLP** turn spoken input into structured records; designed **KasiScore**, an AI credit-scoring feature.
 - Stack:** React 19, TypeScript, Supabase/PostgreSQL, GitHub Actions CI/CD on Vercel.
- CAPS AI Tutor — Conversational AI Agent**
Founder & AI Engineer

LLM agent + integrations

 - Built a production **conversational AI agent** on **AWS Bedrock (Claude)** with **prompt engineering** and RAG-style grounding on curriculum content.
 - Integrated third-party channels** — WhatsApp and USSD — demonstrating AI integration with external platforms (directly relevant to CRM/third-party integration work).
 - Deployed on Vercel + Render with GitHub Actions; applied LLMops practices for prompt versioning and cost control.
- Enterprise Delivery Management Platform (Logistics)**
Full-Stack Engineer

Node + real-time + API

 - Built a **logistics/marketplace-style** operations platform (Takealot drivers): trip tracking, cash-on-delivery verification, dispatch, and admin dashboards.
 - Backend:** Node.js, Express, PostgreSQL, Prisma, Redis, Bull Queue, JWT, **Socket.IO** real-time — solid API design and systems architecture.
 - Directly matches the "logistics / marketplace experience" nice-to-have and internal operational-tooling focus.

PROFESSIONAL EXPERIENCE

Discover Graduate Trainee — Technology & Analytics

Feb 2025 – Present

Vodacom Financial Services — Johannesburg, South Africa

- **Collaborate directly with business stakeholders** and senior leaders, translating operational challenges into data-driven tooling and automation.
- Build **operational dashboards and automation** with Python and BI tools; evaluate **Generative AI** use cases for internal efficiency.
- Support technology initiatives across Risk, Assurance, Service Management, and AWS Cost Optimization — strengthening business acumen and cloud-cost awareness.

Reporting Analyst Intern

Jun 2024 – Jan 2025

Vodacom Financial Services — Johannesburg, South Africa

- Built dashboards and automated reporting; performed data extraction, transformation, and KPI analytics.

Data Scientist (Project-Based)

Cross-Border

Vodafone Portugal — Data Science Project

- Extracted and modelled large datasets on **GCP / BigQuery**; applied ML with Vertex AI to derive insights.

EDUCATION

Enterprise and Technology Management

NWU Business School • 2024

BSc Mathematics and Physics

University of Johannesburg • 2019 – 2023

CERTIFICATIONS

Machine Learning Specialization — DeepLearning.AI / Stanford

ITIL 4 Foundation

WHY ME FOR THIS ROLE

- **Founding-engineer mindset** — I've already built and shipped AI products solo (kasikash.com).
- Comfortable in ambiguity with **minimal direction**.
- Full-stack **Node.js + React** with real **production LLM** experience.
- Logistics/marketplace build experience (nice-to-have match).
- Business acumen from partnering with Vodacom leadership.
